

EVault Data Protection for Credit Unions

Key Benefits

- Certified by many core system vendors
- Enables NCUA compliance
- Ensured disaster recovery and business continuity
- Fast return to operations
- Simplifies IT
- Easy branch office backup
- Cost-effective solutions
- Choice of delivery models
- Secure, end-to-end encryption

Keep Your Credit Union Data Compliant and Your Operations Continuous.

EVault® Data Protection solutions enable your credit union to backup and restore data quickly, manage it easily, and keep it compliant. They support your core processors and assure business continuity, simplified IT, and reduced costs.

Making sure your data is always secure and available is challenging. You must address regulatory requirements and NCUA best practices while dealing with limited resources. Maybe you also deal with unreliable and risky tape backup systems, exploding data growth, overworked IT staff, or the management of multiple branch offices. EVault gives you peace of mind. Your backups and restores become fast, secure, and compliant.

Work with a Company that Understands Credit Unions

Since 1997 hundreds of credit unions have chosen us because we understand their business issues. We don't need a learning curve to implement your solution—we act as part of your team, and help you test everything so you know it's solid.

Our technology is certified by major core processing vendors including FiServ CUSA, XP, ITI, and Harland. We're a Microsoft Global Top 150 and Certified Gold Technology partner. And we support the data protection industry's broadest range of platforms and applications.

Eliminate Risk while You Increase Productivity

Our disk-to-disk backups eliminate the risks and counter-productivity of tapes. Your employees don't spend time searching for lost files. Instead, they point-and-click to restore a file, and get back to profitable work. Your data is encrypted in transit and in storage, so there's no danger of compromised customer information. And we're SSAE 16 compliant—proof to auditors about our internal controls.

“EVault has solved every single one of our pain points.”

Nancy Bourdon-Meyer
Vice President/CIO,
City County Credit Union

Vertical Solution

EVault Data Protection
for Credit Unions

EVault Data Protection solutions for Credit Unions are powered by the industry's only fully-integrated data protection technology. You choose the delivery model that fits your business: automatic backups via EVault SaaS; EVault Software for granular control; or EVault Managed Services. Whichever you use, your data protection scales seamlessly as your business grows.

Work the Way You Need

Software-as-a-Service

EVault SaaS offers "set it and forget it" online backup and recovery for small-to-medium businesses that need easy-to-manage data protection.

EVault SaaS Plus is our customizable service for mid- to large-size businesses with larger data sets and more stringent compliance requirements.

EVault Software: Advanced software for full control

Our licensed software solution makes it easy to meet internal and regulatory requirements for security, availability, and retention. There's broad support for operating systems and platforms. Plug-ins let you back up and restore critical data within individual databases and mailboxes.

EVault Managed Services

If you lack time or resources, we'll handle data protection for you. We fine-tune storage, troubleshoot problems, provide detailed reports, and restore files quickly.

Powerful features make data protection complete and easy:

EVault DeltaPro™

Backs up only new and changed data, dramatically reducing storage footprint.

Support for Applications

Agents protect Microsoft Exchange, SQL Server, SharePoint, and Cluster Services, and Oracle databases.

Web CentralControl

Configure, monitor, and manage backups from anywhere with Internet access.

Regulatory Compliance

Easily satisfy SOX, GLBA and others.

Bandwidth Throttling and Adaptive Compression

Minimize impact on network performance.

Deduplication

Eliminate duplicate data within backup jobs, saving storage space.

Replication (via add-on products)

Mirror backups to a secondary vault, ensuring disaster recovery.
