

EVault Operational Assessment Services

Key Benefits

- Environment and needs analysis
- Configuration audit
- Best practices recommendation
- Comprehensive documentation

Do you want to review your current data protection strategy with EVault®? Would you like an audit of your existing EVault solution to ensure it meets your current business needs? EVault Operational Assessment Services audit your existing EVault data protection solution. Our consultants analyze your current state—from the health of your existing configuration, compliance mandates, security needs, and RTO objectives to storage resources—and assess whether your existing solution meets your current business needs. As a result of an assessment, you will receive a recommended plan of action to ensure that you maximize the benefits of the EVault solution.

Environment and Needs Analysis

The first step is to thoroughly understand your existing data protection strategy. Our consultants perform an environment and needs analysis to assess if your existing strategy meets your current needs. We will review your current business requirements for data protection and disaster recovery, taking into consideration your requirements for security, compliance, and data retention.

Configuration Audit

Next, our consultants perform a comprehensive audit of your current solution. This includes an analysis of how Agents are configured, an examination of log files to identify any recurring issues, a review of the software, operating system and application versions currently in use, and an evaluation of network and hardware performance. If we find any issues that deviate with our best practices, we recommend a course of action to resolve them.

Comprehensive Documentation

The final phase of an Operational Assessment service is to provide documentation on the audit. This documentation provides a review of all of the issues found during the audit and remediation options, including our recommended best practices to move forward. If a new overall solution is recommended, the details are provided in this document as well as deployment options. In addition to the audit details and recommendations, the needs assessment and current EVault configuration will be documented.

Professional Services
EVault Operational
Assessment Services

EVault Operational Assessment Services are part of the EVault Professional Services continuum of services that enable you to optimize your EVault solution and continue to maximize the benefits of the solution.
