

EVault Proof of Concept Services

Key Benefits

- Tailored to your environment
- Deployment assistance
- Tangible results

Do you want validation that an EVault[®] data protection solution will meet your needs? Would you like to see the solution used within your environment? Do you want avoid issues with installation by viewing how the product performs in a test environment? EVault Proof of Concept (POC) Services help you view the benefits of our solution in a test environment. Our consultants implement the EVault solution in your environment, allowing you to view tangible results before a full scale implementation our solution.

Tailored to Your Environment

Before we begin implementing an EVault solution in your environment, we meet with you and understand your requirements for data protection, taking into account your hardware and software environment, regulatory compliance requirements, security/risk tolerance, and geographic locations. This ensures that all parties understand the requirements for verification. The end result is defined metrics that will be verified during the POC.

Deployment Assistance

Next, EVault experts install and configure the EVault solution according to your requirements. Our consultants provide you with a demonstration so you get a head start on how the solution works. During the POC you view how the solution performs in your environment.

Tangible Results

Our data protection and disaster recovery experts will measure the EVault solution based on your established metrics. We leave you with documentation on how the EVault solution was configured and the results of the metrics testing so you have tangible proof of the benefits our solution provides. EVault POC Services are part of the EVault Professional Services continuum of services that allow you to discover what benefits an EVault solution can provide.
