Securities LLC

EVault® Data Protection is trusted by hundreds of financial services companies globally. Since 1997, we've delivered complete solutions based on world-class EVault technology that are easy to use, scalable, and customized to suit your needs.

### Secure Technology and Infrastructure

Your data is completely safe with EVault. It's backed up to one of our secure, Tier III & IV data centers. There are no tapes or physical transport involved—EVault online, disk-to-disk backup eliminates unreliability and human error. Your backups are fast, so you don't spend unnecessary time waiting to restore data. EVault infrastructure and patented technology gives you peace of mind.

### 100% Disaster Recovery

Among your peers who have suffered disasters, many chose EVault so they can say, "Never again." You get the fastest, most reliable online backup and recovery available. In addition, our Professional Services team can help you devise and test emergency procedures and conduct training based on your specific needs. If disaster strikes, you're covered.

### Central Control and Brilliant Simplicity

Everything is easy, from setup and scheduling to reporting and restores. That includes offices across the hall or across the country, using the Web CentralControl interface. So it's easy to satisfy your company's data retention policies. You also control costs—no more productivity lost needlessly to the restore process. You also get passionate support from expert insiders, at no cost—24/7 for critical issues.

### Certified, Compliant Security and Privacy

EVault makes it easy to comply with regulatory requirements, including the Gramm-Leach-Bliley Act. FIPS-approved, 256-bit AES encryption shields data in transit and in storage, and there's no "back door" to let anyone view protected information, not even EVault. There are no tapes or physical transport involved—EVault online, disk-to-disk backup eliminates human error.

**Vertical Solution**  
Why EVault SaaS  
for Financial Services  
Companies?

“No one has to retrieve tapes. No one has to schedule the backup.  
No one has to come in on a holiday weekend and put a tape in. It’s  
smooth as silk.”

—Shane Venable  
VP, Technology  
Darby Bank & Trust
